## Index

Note: Page numbers representing figures are in **bold**; tables are in *italics*.

A-7A Corsair II, 139, 155, 163, 402, 403 velocity frequency response, 163, 164	like attenuator, 162
Accelerated flight, 210	Aircraft body fixed axes, 13–18
Acceleration:	Aircraft geometry, 5
inertial, 66	Aircraft trim condition, 57–59 calculation
initial pitch, 262	
normal, 262	Aerotrim, 61–64
perturbations, derivatives, 346–350	controls fixed static stability, 60–61
and rotary motion, 68	elevator to trim, 59–60 Airframes:
tangential, 68	
Ackeret theory, 330	configuration, trimmed equilibrium, 32 flexibility, 39
Adjustment:	Algorithms:
elevator tab, 49	Fadeeva, 118
trim tab, 49	· · · · · · · · · · · · · · · · · · ·
Adverse roll, 179	Generalised Eigenvalue Problem, 118
Adverse yaw, 181	American Military Specification
Aerobatic aircraft, 69–70	MIL-F-8785C, 250–251
Aerodynamic:	American Military Standard MIL-STD-1797A, 251
centre, aerofoil, 28	Angle of attack, 28–29
coefficients, dimensionless, 82	
control derivatives, 371–377	Angular:
control terms, 76	perturbation, 75
drag, 322	relationships, symmetric flight,
force, and moment components, 339	16–17, <b>16</b>
modelling, 320–336	velocities, 22–24 Apparent inertia, 347
limitations of, 335	Apparent mertia, 347 Apparent mass, 347
operating conditions, 57	Approximations:
spring, 186	dutch roll mode, 192–193
stability derivatives, 76	roll mode, 189–190
longitudinal, 337–350	short period mode, 147–150
terms, 75–76	spiral mode, 190–192
Aerofoil:	Aspect ratio, 25
aerodynamic centre, 29	Atmospheric disturbances, 4, 5
cambered, 28	Attitude, 13, 18
centre of pressure, 28	angles, 18
Aerotrim, 61–64	constant steady state pitch, 110
Agility, 212	perturbation, 74
Aileron, displacements, 27	rate, 22
Aircraft:	Augmentation system, design, 280–283, <b>281</b>
classification, 252	Augmented state equation, 132–133
dynamics, and manoeuvring, 222–223	Automatic flight control system (AFCS) 2
Aircraft behaviour:	Autopilot, stability augmentation system,
like amplifier, 162	275

effect, 185 effectiveness, 56 moment arm, 26, 27 volume ratio, 26, 27, 359 Final value theorem, 111, 181, 243, 262 Fixed axes, aircraft body, 13–18 Fixed neutral point: locating, 334–335 and Mach number, 334–335 Flat earth, 12, 13 Flexibility, airframes, 39 Flight control system (FCS), 274—276, 275 design, 279 electronic (EFCS), 274 mechanical elements, 278 Flight critical stability augmentation see Flight control system Flight envelopes, 6, 7, 253–255, 254, 255, 256 extended, 240 large, 37 McDonnell-Douglas A-4D Skyhawk, 254–255, 255, 255 operational, 253, 254 permissible, 253 service, 253 Flight path angle, 13 Flight phase, 252 categories, 252 Flight test measurement, 325–337, 326 Flow effects, 38 Fly-by-wire: aeroplane, 251 civil transport aeroplanes, 9 controls, 4, 4 system, 278–280, 279 reliability, 279 unstable airframes, 295 Flying, and handling, 3–4, 165–167, 200–202, 240 Flying qualities: lateral–directional, 263–266 Level of, 252–253 longitudinal, 256–260 Full state feedback, 312, 314 Functions: Dirac delta, 123 unit impulse, 123 Functions:  Dirac delta, 123 unit impulse, 123 Functions:  Dirac delta, 123 unit impulse, 123 Functions:  Dirac delta, 123 unit impulse, 123 Fixad herthic, 160 plot, Bode diagram, 160 Generalised: force equations, 70–71 moment equations, 71–72 Gradients, stable, 257–258, 258 Gravitational: force equations, 70–71 moment equations, 71–72 Gradients, stable, 257–258, 258 Gravitational: force equations, 70–71 moment equations, 71–72 Handley Page Jetstream, 167, 168, 202, 203 elevator angle tor trim, 46 flight rest, 45, 50–51, 167 phugoid response, 169 roll subsidence mode, 202, 203 with atiplane, 40 wind tunnel experiments, 39, 40 without atiplane, 40 wind tunnel exper	Fin:	Frequency:
effectiveness, 56 moment arm, 26, 27 volume ratio, 26, 27, 359 Final value theorem, 111, 181, 243, 262 Fixed axes, aircraft body, 13–18 Fixed neutral point: locating, 334-335 and Mach number, 334-335 Flat earth, 12, 13 Flexibility, airframes, 39 Flight control system (FCS), 274 mechanical elements, 278 Flight control system Flight envelopes, 6, 7, 253–255, 254, 255, 256 extended, 240 large, 37 McDonnell-Douglas A-4D Skyhawk, 254–255, 255, 256 normal load factor, 255 operational, 253, 254 permissible, 253 service, 253 Flight path angle, 13 Flight test measurement, 325–337, 326 Flow effects, 38 Fly-by-wire: aeroplane, 251 civil transport aeroplanes, 9 controls, 4, 4 system, 278–280, 279 reliability, 279 unstable airframes, 295 Flying, and handling, 3-4, 165–167, 200–202, 240 Flying qualities: lateral-directional, 263–266 Level of, 252–253 longitudinal, 256–260 Functional visibility, 5, 241, 280 Functions: Dirac delta, 123 unit impulse, 123 Functions: Dirac delta, 123 untition 160	disturbance, 55	phugoid, 107, 146, 162, 259, 260
moment arm, 26, 27 volume ratio, 26, 27, 359 Final value theorem, 111, 181, 243, 262 Fixed axes, aircraft body, 13–18 Fixed neutral point: locating, 334–335 and Mach number, 334–335 Flat earth, 12, 13 Flexibility, airframes, 39 Flight control system (FCS), 274–276, 275 design, 279 electronic (EFCS), 274 mechanical elements, 278 Flight critical stability augmentation see Flight control system Flight ericlast stability augmentation see Flight control system Flight provided at the stable and phase, calculation, 160 piot, Bode diagram, 160 Generalised: force equations, 70–71 moment equations, 71–72 Gradients, stable, 257–258, 258 Gravitational: force components, 74–75 terms, 74–75 gyration, longitudinal radius of, 263 Handley Page Jetstream, 167, 168, 202, 203 elevator angle to trim, 46 flight test, 45, 50–51, 167 phugoid response, 169 roll subsidence mode, 202, 203 with tailplane, 40 wind tunnel experiments, 39, 40 without tailplane, 40 Handling, 200–202 and flying, 165–167, 240 long term, 241 pilot's perception, 241 qualities, 3–4, 3, 4 criteria, 247 system, 278–280, 279 reliability, 279 unstable airframes, 295 Flying and handling, 3–4, 165–167, 200–202, 240 Flying qualities: lateral-directional, 263–266 Level of, 252–253 longitudinal, 256–260  Functions:  Dirac delta, 123 unit impulse, 123  Gain: logarithmic, 160 margin, 162 and phase, calculation, 160 piot, Bode diagram, 160 Generalised: force components, 74–75 terms, 74–75 gyration, longitudinal radius of, 263  Handley Page Jetstream, 167, 168, 202, 203 elevator angle to trim, 46 flight test, 45, 50–51, 167 phugoid response, 169 roll subsidence mode, 202, 203 with tailplane, 40 Handling, 200–202 and flying, 165–167, 240 long term, 241 pilot's perception, 241 qualities, 3–4, 3, 4 criteria, 247 short term, 241 Harmonisation, of control power, 240 Height response, 128 High pass filter, 276 Hinge moment to trim, 50, 51 Horizontal fuselage datum, 14, 59 Incidence angle feedback to elevator, 298–299, 298 Incidence lag, 243, 247–249, 249	effect, 185	response, 158-165, 195-200
volume ratio, 26, 27, 359 Final value theorem, 111, 181, 243, 262 Fixed axes, aircraft body, 13–18 Fixed neutral point: locating, 334–335 and Mach number, 334–335 Flat earth, 12, 13 Flexibility, airframes, 39 Flight control system (FCS), 274 mechanical elements, 278 Flight critical stability augmentation see Flight envelopes, 6, 7, 253–255, 254, 255, 256 extended, 240 large, 37 McDonnell-Douglas A-4D Skyhawk, 254–255, 255, 256 normal load factor, 255 operational, 253, 254 permissible, 253 service, 253 Flight path angle, 13 Flight pass, 252 categories, 252 Flight test measurement, 325–337, 326 Flow effects, 38 Fly-by-wire: aeroplane, 251 civil transport aeroplanes, 9 controls, 4, 4 system, 278–280, 279 reliability, 279 unstable airframes, 295 Flying, and handling, 3–4, 165–167, 200–202, 240 Flying qualities: lateral-directional, 263–266 Level of, 252–253 longitudinal, 256–260  Functions: Dirac detta, 123 unit impulse, 123  Gain: logarithmic, 160 margin, 162 and phase, calculation, 160 plot, Bode diagram, 160 Generalised: force equations, 70–71 moment equations, 71–72 Gradients, stable, 257–258, 258 Gravitational: force components, 74–75 terms, 74–75 Gyration, longitudinal radius of, 263 light test, 45, 50–51, 167 phugoid response, 169 roll subsidence mode, 202, 203 with tailplane, 40 wind tunnel experiments, 39, 40 without tailplane, 40 Handling, 200–202 and flying, 165–167, 240 long term, 241 qualities, 3–4, 3, 4 criteria, 247 short term, 241 Harmonisation, of control power, 240 Height response, 128 High pass filter, 276 High phase filter, 252 High test measurement, 325–366 ling testing delta, 123 unit impulse, 123  Flaction: logarithmic, 160 margin, 162 and phase, calculation, 160 plot, Bode diagram, 160 Generalised: force components, 74–75 feradients, stable, 257–258, 258 Gravitational: force components, 74–75 term	effectiveness, 56	Full state feedback, 312, 314
Final value theorem, 111, 181, 243, 262 Fixed axes, aircraft body, 13–18 Fixed neutral point: locating, 334–335 and Mach number, 334–335 Flat earth, 12, 13 Flexibility, airframes, 39 Flight control system (FCS), 274 mechanical elements, 278 Flight control system Flight control system Flight envelopes, 6, 7, 253–255, 254, 255, 256 extended, 240 large, 37 McDonnell-Douglas A-4D Skyhawk, 254–255, 255, 256 normal load factor, 255 operational, 253, 254 permissible, 253 service, 253 Flight phase, 252 categories, 252 Flight test measurement, 325–337, 326 Flow effects, 38 Fly-by-wire: aeroplane, 251 civil transport aeroplanes, 9 controls, 4, 4 system, 278–280, 279 reliability, 279 unstable airframes, 295 Flying, and handling, 3–4, 165–167, 200–202, 240 Flying qualities: lateral—directional, 263–266 Level of, 252–253 longitudinal, 256–260  Dirac delta, 123 unit impulse, 123  Gain: logarithmic, 160 margin, 162 and phase, calculation, 160 floed diagram, 160 Generalised: force equations, 70–71 moment equations, 71–72 Gradients, stable, 257–258, 258 Gravitational: force components, 74–75 terms, 74–75 terms, 74–75 fereinalised: force equations, 70–71 moment equations, 71–72 Gradients, stable, 257–258, 258 Gravitational: force components, 74–75 terms, 74–75 terms, 74–75 foryation, longitudinal radius of, 263  Handley Page Jetstream, 167, 168, 202, 203 elevator angle to trim, 46 flight response, 169 roll subsidence mode, 202, 203 with tailplane, 40 wind tunnel experiments, 39, 40 without tailplane, 40 Handling, 200–202 and flying, 165–167, 240 longitudinal, 250–266 longitudinal, 254–266 longitudinal, 254–266 linge moment to trim, 50, 51 Horizontal fuselage datum, 14, 59 Incidence angle feedback to elevator, 298–299, 298 Incidence lag, 243, 247–249, 249	moment arm, 26, 27	Functional visibility, 5, 241, 280
Fixed axes, aircraft body, 13–18 Fixed neutral point: locating, 334–335 and Mach number, 334–335 Flat earth, 12, 13 Flexibility, airframes, 39 Flight control system (FCS), 274–276, 275 design, 279 electronic (EFCS), 274 mechanical elements, 278 Flight critical stability augmentation see Flight control system Flight envelopes, 6, 7, 253–255, 254, 255, 256 extended, 240 large, 37 McDonnell-Douglas A-4D Skyhawk, 254–255, 255, 255, 256 onormal load factor, 255 operational, 253, 254 permissible, 253 service, 253 Flight phase, 252 categories, 252 Flight test measurement, 325–337, 326 Flow effects, 38 Fly-by-wire: aeroplane, 251 civil transport aeroplanes, 9 controls, 4, 4 system, 278–280, 279 reliability, 279 unstable airframes, 295 Flying, and handling, 3–4, 165–167, 200–202, 240 Flying qualities: lateral–directional, 263–266 Level of, 252–253 longitudinal, 256–260  Gain: logarithmic, 160 margin, 162 and phase, calculation, 160 plot, Bode diagram, 160 Generalised: force equations, 70–71 moment equations, 71–72 Gradients, stable, 257–258, 258 Gravitational: force components, 74–75 terms, 74–75 terms, 74–75 foryational: force components, 74–75 terms, 74–75 terms, 74–75 foryational: force components, 74–75 terms, 74–75 dyrational: force components, 74–75 terms, 74–75	volume ratio, 26, <b>27</b> , 359	Functions:
Fixed axes, aircraft body, 13–18 Fixed neutral point: locating, 334–335 and Mach number, 334–335 Flat earth, 12, 13 Flexibility, airframes, 39 Flight control system (FCS), 274–276, 275 design, 279 electronic (EFCS), 274 mechanical elements, 278 Flight critical stability augmentation see Flight control system Flight envelopes, 6, 7, 253–255, 254, 255, 256 extended, 240 large, 37 McDonnell-Douglas A-4D Skyhawk, 254–255, 255, 256 normal load factor, 255 operational, 253, 254 permissible, 253 service, 253 Flight path angle, 13 Flight phase, 252 categories, 252 Flight test measurement, 325–337, 326 Flow effects, 38 Fly-by-wire: aeroplane, 251 civil transport aeroplanes, 9 controls, 4, 4 system, 278–280, 279 reliability, 279 unstable airframes, 295 Flying, and handling, 3–4, 165–167, 200–202, 240 Flying qualities: lateral–directional, 263–266 Level of, 252–253 longitudinal, 256–260  Gain: logarithmic, 160 margin, 162 and phase, calculation, 160 plot, Bode diagram, 160 Generalised: force equations, 70–71 moment equations, 70–71 moment equations, 70–75 terms, 74–75 foradients, stable, 257–258, 258 Gravitational: force components, 74–75 terms, 74–75 flight page Jetstream, 167, 168, 202, 203 elevator angle to trim, 46 flight test, 45, 50–51, 167 phugoid response, 169 roll subsidence mode, 202, 203 with tailplane, 40 wind tunnel experiments, 39, 40 without tailplane, 40 Handling, 200–202 and flying, 165–167, 240 long term, 241 pilot's perception, 241 qualities, 3–4, 3, 4 criteria, 247 short term, 241 Harmonisation, of control power, 240 Height response, 128 High pass filter, 276 Hinge moment to trim, 50, 51 Horizontal fuselage datum, 14, 59		Dirac delta, 123
locating, 334–335 and Mach number, 334–335 Flat earth, 12, 13 Flexibility, airframes, 39 Flight control system (FCS), 274–276, 275 design, 279 electronic (EFCS), 274 mechanical elements, 278 Flight control system Flight envelopes, 6, 7, 253–255, 256 extended, 240 large, 37 McDonnell-Douglas A-4D Skyhawk, 254–255, 255, 255, 256 normal load factor, 255 operational, 253, 254 permissible, 253 service, 253 Flight path angle, 13 Flight phase, 252 categories, 252 Flight test measurement, 325–337, 326 Flow effects, 38 Fly-by-wire: aeroplane, 251 civil transport aeroplanes, 9 controls, 4, 4 system, 278–280, 279 reliability, 279 unstable airframes, 295 Flying, and handling, 3–4, 165–167, 200–202, 240 Flying qualities: lateral-directional, 263–266 Flying qualities: lateral-directional, 263–266 Level of, 252–253 longitudinal, 256–260  Gan: logarithmic, 160 margin, 162 and phase, calculation, 160 plot, Bode diagram, 160 Generalised: force equations, 70–71 moment equations, 71–72 Gradients, stable, 257–258, 258 Gravitational: force components, 74–75 terms, 74–75 terms, 74–75 fyration, longitudinal radius of, 263  Handley Page Jetstream, 167, 168, 202, 203 elevator angle to trim, 46 flight test, 45, 50–51, 167 phugoid response, 169 roll subsidence mode, 202, 203 with tailplane, 40 wind tunnel experiments, 39, 40 without tailplane, 40 Handling, 200–202 and flying, 165–167, 240 long term, 241 Harmonisation, of control power, 240 Height response, 128 High pass filter, 276 Hinge moment to trim, 50, 51 Horizontal fuselage datum, 14, 59 Flying qualities: lateral-directional, 263–266 Level of, 252–253 longitudinal, 256–260	Fixed axes, aircraft body, 13-18	unit impulse, 123
locating, 334–335 and Mach number, 334–335 Flat earth, 12, 13 Flexibility, airframes, 39 Flight control system (FCS), 274–276, 275 design, 279 electronic (EFCS), 274 mechanical elements, 278 Flight control system Flight envelopes, 6, 7, 253–255, 256 extended, 240 large, 37 McDonnell-Douglas A-4D Skyhawk, 254–255, 255, 255, 256 normal load factor, 255 operational, 253, 254 permissible, 253 service, 253 Flight path angle, 13 Flight phase, 252 categories, 252 Flight test measurement, 325–337, 326 Flow effects, 38 Fly-by-wire: aeroplane, 251 civil transport aeroplanes, 9 controls, 4, 4 system, 278–280, 279 reliability, 279 unstable airframes, 295 Flying, and handling, 3–4, 165–167, 200–202, 240 Flying qualities: lateral-directional, 263–266 Flying qualities: lateral-directional, 263–266 Level of, 252–253 longitudinal, 256–260  Gan: logarithmic, 160 margin, 162 and phase, calculation, 160 plot, Bode diagram, 160 Generalised: force equations, 70–71 moment equations, 71–72 Gradients, stable, 257–258, 258 Gravitational: force components, 74–75 terms, 74–75 terms, 74–75 fyration, longitudinal radius of, 263  Handley Page Jetstream, 167, 168, 202, 203 elevator angle to trim, 46 flight test, 45, 50–51, 167 phugoid response, 169 roll subsidence mode, 202, 203 with tailplane, 40 wind tunnel experiments, 39, 40 without tailplane, 40 Handling, 200–202 and flying, 165–167, 240 long term, 241 Harmonisation, of control power, 240 Height response, 128 High pass filter, 276 Hinge moment to trim, 50, 51 Horizontal fuselage datum, 14, 59 Flying qualities: lateral-directional, 263–266 Level of, 252–253 longitudinal, 256–260	Fixed neutral point:	
and Mach number, 334–335 Flat earth, 12, 13 Flexibility, airframes, 39 Flight control system (FCS), 274–276, 275 design, 279 electronic (EFCS), 274 mechanical elements, 278 Flight critical stability augmentation see Flight envelopes, 6, 7, 253–255, 254, 255, 256 extended, 240 large, 37 McDonnell-Douglas A-4D Skyhawk, 254–255, 255, 256 normal load factor, 255 operational, 253, 254 permissible, 253 service, 253 Flight path angle, 13 Flight phase, 252 categories, 252 Flight test measurement, 325–337, 326 Flow effects, 38 Fly-by-wire: aeroplane, 251 civil transport aeroplanes, 9 controls, 4, 4 system, 278–280, 279 reliability, 279 unstable airframes, 295 Flying, and handling, 3–4, 165–167, 200–202, 240 Flying qualities: lateral–directional, 263–266 Level of, 252–253 longitudinal, 256–260  logarithmic, 160 margin, 162 and phase, calculation, 160 Generalised: force equations, 70–71 moment equations, 71–72 Gradients, stable, 257–258, 258 Gravitational: force components, 74–75 terms, 74–75 Gyration, longitudinal radius of, 263  Handley Page Jetstream, 167, 168, 202, 203 elevator angle to trim, 46 flight test, 45, 50–51, 167 phugoid response, 169 roll subsidence mode, 202, 203 with tailplane, 40 wind tunnel experiments, 39, 40 without tailplane, 40 Handling, 200–202 and flying, 165–167, 240 long term, 241 pilot's perception, 241 qualities, 3–4, 3, 4 criteria, 247 short term, 241 Harmonisation, of control power, 240 Height response, 128 High pass filter, 276 Hinge moment to trim, 50, 51 Horizontal fuselage datum, 14, 59 Flying qualities: lateral–directional, 263–266 Incidence angle feedback to elevator, 298–299, 298 Incidence lag, 243, 247–249, 249		Gain:
Flat earth, 12, 13 Flexibility, airframes, 39 Flight control system (FCS), 274–276, 275 design, 279 electronic (EFCS), 274 mechanical elements, 278 Flight critical stability augmentation see Flight control system Flight envelopes, 6, 7, 253–255, 254, 255, 256 extended, 240 large, 37 McDonnell-Douglas A-4D Skyhawk, 254–255, 255, 256 normal load factor, 255 operational, 253, 254 permissible, 253 service, 253 Flight phase, 252 categories, 252 Flight test measurement, 325–337, 326 Flow effects, 38 Fly-by-wire: aeroplane, 251 civil transport aeroplanes, 9 controls, 4, 4 system, 278–280, 279 reliability, 279 unstable airframes, 295 Flying, and handling, 3–4, 165–167, 200–202, 240 Flying qualities lateral–directional, 263–266 Level of, 252–253 longitudinal, 256–260 Incidence lag, 243, 247–249, 249  margin, 162 and phase, calculation, 160 plot, Bode diagram, 160 Generalised: force equations, 70–71 moment equations, 71–72 Gradients, stable, 257–258, 258 Gravitational: force components, 74–75 terms, 74–75 terms, 74–75 design, 70–71 moment equations, 70–71		logarithmic, 160
Flexibility, airframes, 39 Flight control system (FCS), 274–276, 275 design, 279 electronic (EFCS), 274 mechanical elements, 278 Flight critical stability augmentation see Flight envelopes, 6, 7, 253–255, 254, 255, 256 extended, 240 large, 37 McDonnell-Douglas A-4D Skyhawk, 254–255, 255, 256 normal load factor, 255 operational, 253, 254 permissible, 253 service, 253 Flight path angle, 13 Flight phase, 252 categories, 252 Flight test measurement, 325–337, 326 Flow effects, 38 Fly-by-wire: aeroplane, 251 civil transport aeroplanes, 9 controls, 4, 4 system, 278–280, 279 reliability, 279 unstable airframes, 295 Flying, and handling, 3–4, 165–167, 200–202, 240 Flying qualities: lateral-directional, 263–266 Level of, 252–253 longitudinal, 256–260  and phase, calculation, 160 generalised: force equations, 70–71 moment equations, 71–72 Gradients, stable, 257–258, 258 Gravitational: force components, 74–75 terms, 74–75 Gyration, longitudinal radius of, 263  Handley Page Jetstream, 167, 168, 202, 203 elevator angle to trim, 46 flight test, 45, 50–51, 167 phugoid response, 169 roll subsidence mode, 202, 203 with tailplane, 40 wind tunnel experiments, 39, 40 without tailplane, 40 wind tunnel experiments, 39, 40 without tailplane, 40 long term, 241 pilot's perception, 241 qualities, 3–4, 3, 4 criteria, 247 short term, 241 Harmonisation, of control power, 240 Height response, 128 High pass filter, 276 Hinge moment to trim, 50, 51 Horizontal fuselage datum, 14, 59  Incidence angle feedback to elevator, 298–299, 298 Incidence lag, 243, 247–249, 249		margin, 162
Flight control system (FCS), 274–276, 275 design, 279 electronic (EFCS), 274 mechanical elements, 278 Flight control system Flight envelopes, 6, 7, 253–255, 254, 255, 256 extended, 240 large, 37 McDonnell-Douglas A-4D Skyhawk, 254–255, 255, 256 normal load factor, 255 operational, 253, 254 permissible, 253 service, 253 Flight path angle, 13 Flight phase, 252 categories, 252 Flight test measurement, 325–337, 326 Flow effects, 38 Fly-by-wire: aeroplane, 251 civil transport aeroplanes, 9 controls, 4, 4 system, 278–280, 279 reliability, 279 unstable airframes, 295 Flying, and handling, 3–4, 165–167, 200–202, 240 Flying qualities: lateral–directional, 263–266 Level of, 252–253 longitudinal, 256–260  plot, Bode diagram, 160 Generalised: force equations, 70–71 moment equations, 71–72 Gradients, stable, 257–258, 258 Gravitational: force components, 74–75 terms, 74–75 Gyration, longitudinal radius of, 263  Handley Page Jetstream, 167, 168, 202, 203 elevator angle to trim, 46 flight test, 45, 50–51, 167 phugoid response, 169 roll subsidence mode, 202, 203 with tailplane, 40 Handling, 200–202 and flying, 165–167, 240 long term, 241 pilot's perception, 241 qualities, 3–4, 3, 4 criteria, 247 short term, 241 Harmonisation, of control power, 240 Height response, 128 High pass filter, 276 Hinge moment to trim, 50, 51 Horizontal fuselage datum, 14, 59 Incidence angle feedback to elevator, 298–299, 298 Incidence lequations, 70–71 moment equations, 71–72 Gradients, stable, 257–258, 258 Gravitational: force components, 74–75 gradients, stable, 257–258 devator angle to trim, 46 flight test, 45, 50–51, 167 phugoid response, 169 roll subsidence mode, 202, 203 with tailplane, 40 Handling, 200–202 Handling, 200–202 Handling, 200–202 Handling, 200–202 Handli		
design, 279 electronic (EFCS), 274 mechanical elements, 278 Flight critical stability augmentation see Flight control system Flight envelopes, 6, 7, 253–255, 254, 255, 256 extended, 240 large, 37 McDonnell-Douglas A-4D Skyhawk, 254–255, 255, 256 normal load factor, 255 operational, 253, 254 permissible, 253 service, 253 Flight path angle, 13 Flight phase, 252 categories, 252 Flight test measurement, 325–337, 326 Flow effects, 38 Fly-by-wire: aeroplane, 251 civil transport aeroplanes, 9 controls, 4, 4 system, 278–280, 279 reliability, 279 unstable airframes, 295 Flying, and handling, 3-4, 165–167, 200–202, 240 Flying qualities: lateral-directional, 263–266 Level of, 252–253 longitudinal, 256–260  Generalised: force equations, 70–71 moment equations, 71–72 Gradients, stable, 257–258, 258 Gravitational: force components, 74–75 terms, 74–75 Gradients, stable, 257–258, 258 Gravitational: force equations, 70–71 moment equations, 71–72 Gradients, stable, 257–258, 258 Gravitational: force equations, 70–71 moment equations, 71–72 Gradients, stable, 257–258, 258 Gravitational: force components, 74–75 terms, 74–75 flying equations of cardients, stable, 257–258, 258 Gravitational: force components, 74–75 terms, 74–75 flying equations, 70–71 moment equations, 71–72 Gradients, stable, 257–258, 258 Gravitational: force components, 74–75 terms, 74–75 flying equations, 70–71 moment equations, 71–72 Gradients, stable, 257–258, 258 Gravitational: force components, 74–75 terms, 74–75 flying equations, 70–71 moment equations, 71–72 Gradients, stable, 257–258, 258 Gravitational: force components, 74–75 terms, 74–75 flying equations, 70–71 moment equations, 71–72 Gradients, stable, 257–258, 258 Gravitational: force components, 74–75 terms, 74–75 ferms, 74–75 flying equations, 70–71 moment equations, 70–72 foradients, stable, 257–258 dravitational: force components, 74–75 ferms, 74–75 furms, 74		plot, Bode diagram, 160
electronic (EFCS), 274 mechanical elements, 278 Flight critical stability augmentation see Flight control system Flight envelopes, 6, 7, 253–255, 254, 255, 256 extended, 240 large, 37 McDonnell-Douglas A-4D Skyhawk, 254–255, 255, 256 normal load factor, 255 operational, 253, 254 permissible, 253 service, 253 Flight path angle, 13 Flight phase, 252 categories, 252 Flight test measurement, 325–337, 326 Flow effects, 38 Fly-by-wire: aeroplane, 251 civil transport aeroplanes, 9 controls, 4, 4 system, 278–280, 279 reliability, 279 unstable airframes, 295 Flying, and handling, 3–4, 165–167, 200–202, 240 Flying qualities: lateral-directional, 263–266 Level of, 252–253 longitudinal, 256–260  force equations, 70–71 moment equations, 71–72 Gradients, stable, 257–258, 258 Gravitational: force components, 74–75 terms, 74–75 Gyration, longitudinal radius of, 263  Handley Page Jetstream, 167, 168, 202, 203 elevator angle to trim, 46 flight test, 45, 50–51, 167 phugoid response, 169 roll subsidence mode, 202, 203 with tailplane, 40 wind tunnel experiments, 39, 40 without tailplane, 40 Handling, 200–202 and flying, 165–167, 240 long term, 241 pilot's perception, 241 qualities, 3–4, 3, 4 criteria, 247 short term, 241 Harmonisation, of control power, 240 Height response, 128 High pass filter, 276 Hinge moment to trim, 50, 51 Horizontal fuselage datum, 14, 59 Incidence angle feedback to elevator, 298–299, 298 Incidence lag, 243, 247–249, 249		
mechanical elements, 278  Flight critical stability augmentation see Flight control system  Flight envelopes, 6, 7, 253–255, 254, 255,  256 extended, 240 large, 37  McDonnell-Douglas A-4D Skyhawk, 254–255, 255, 256 normal load factor, 255 operational, 253, 254 permissible, 253 service, 253  Flight path angle, 13  Flight phase, 252 categories, 252  Flight test measurement, 325–337, 326  Fly-by-wire: aeroplane, 251 civil transport aeroplanes, 9 controls, 4, 4 system, 278–280, 279 reliability, 279 unstable airframes, 295  Flying qualities: lateral-directional, 263–266 Level of, 252–253 longitudinal, 256–260  moment equations, 71–72 Gradients, stable, 257–258, 258 Gravitational: force components, 74–75 terms, 74–75 Gradients, stable, 257–258, 258 Gravitational: force components, 74–75 terms, 74–75  Gradients, stable, 257–258, 258 Gravitational: force components, 74–75 terms, 74–75  Gradients, stable, 257–258, 258 Gravitational: force components, 74–75 terms, 74–75  Gradients, stable, 257–258, 258 Gravitational: force components, 74–75 terms, 74–75  Gradients, stable, 257–258, 258 Gravitational: force components, 74–75 terms, 74–75  Gyation, longitudinal radius of, 263  Handley Page Jetstream, 167, 168, 202, 203 elevator angle to trim, 46 flight test, 45, 50–51, 167 phugoid response, 169 roll subsidence mode, 202, 203 with tailplane, 40 Handling, 200–202 and flying, 165–167, 240 long term, 241 pilot's perception, 241 qualities, 3–4, 3, 4 criteria, 247 short term, 241 Harmonisation, of control power, 240 Height response, 128 High pass filter, 276 Hinge moment to trim, 50, 51 Horizontal fuselage datum, 14, 59	=	force equations, 70–71
Flight control system Flight envelopes, 6, 7, 253–255, 254, 255, 256 extended, 240 large, 37 McDonnell-Douglas A-4D Skyhawk, 254–255, 255, 256 normal load factor, 255 operational, 253, 254 permissible, 253 service, 253 Flight path angle, 13 Flight path angle, 13 Flight test measurement, 325–337, 326 Flow effects, 38 Fly-by-wire: aeroplane, 251 civil transport aeroplanes, 9 controls, 4, 4 system, 278–280, 279 reliability, 279 unstable airframes, 295 Flying, and handling, 3–4, 165–167, 200–202, 240 Flying qualities: lateral–directional, 263–266 Level of, 252–253 longitudinal, 256–260  Gravitational: force components, 74–75 terms, 74–75 Gyration, longitudinal radius of, 263  Handley Page Jetstream, 167, 168, 202, 203 elevator angle to trim, 46 flight test, 45, 50–51, 167 phugoid response, 169 roll subsidence mode, 202, 203 with tailplane, 40 wind tunnel experiments, 39, 40 without tailplane, 40 Handley Page Jetstream, 167, 168, 202, 203 elevator angle to trim, 46 flight test, 45, 50–51, 167 phugoid response, 169 roll subsidence mode, 202, 203 with tailplane, 40 wind tunnel experiments, 39, 40 without tailplane, 40 Handley Page Jetstream, 167, 168, 202, 203 elevator angle to trim, 46 flight test, 45, 50–51, 167 phugoid response, 169 roll subsidence mode, 202, 203 with tailplane, 40 wind tunnel experiments, 39, 40 without tailplane, 40 Handley Page Jetstream, 167, 168, 202, 203 elevator angle to trim, 46 flight test, 45, 50–51, 167 phugoid response, 169 roll subsidence mode, 202, 203 with tailplane, 40 Handley Page Jetstream, 167, 168, 202, 203 elevator angle to trim, 46 flight test, 45, 50–51, 167 phugoid response, 169 roll subsidence mode, 202, 203 with tailplane, 40 Handley Page Jetstream, 167, 168, 202, 203 elevator angle to trim, 46 flight test, 45, 50–51, 167 phugoid response, 169 roll subsidence mode, 202, 203 with tailplane, 40 Handling, 200–202 and flying, 165–167, 240 long term, 241 qualities, 3–4, 3, 4 criteria, 247 short term, 241 Harmonisation, of control power, 240 Height response, 126 High test device		
Flight control system Flight envelopes, 6, 7, 253–255, 254, 255, 256 extended, 240 large, 37 McDonnell-Douglas A-4D Skyhawk, 254–255, 255, 256 normal load factor, 255 operational, 253, 254 permissible, 253 service, 253 Flight path angle, 13 Flight phase, 252 categories, 252 Flight test measurement, 325–337, 326 Flow effects, 38 Fly-by-wire: aeroplane, 251 civil transport aeroplanes, 9 controls, 4, 4 system, 278–280, 279 reliability, 279 unstable airframes, 295 Flying, and handling, 3–4, 165–167, 200–202, 240 Flying qualities: lateral–directional, 263–266 Level of, 252–253 longitudinal, 256–260  Gravitational: force components, 74–75 terms, 74–75 Gyration, longitudinal radius of, 263  Handley Page Jetstream, 167, 168, 202, 203 elevator angle to trim, 46 flight test, 45, 50–51, 167 phugoid response, 169 roll subsidence mode, 202, 203 with tailplane, 40 wind tunnel experiments, 39, 40 without tailplane, 40 Handling, 200–202 and flying, 165–167, 240 long term, 241 pilot's perception, 241 qualities, 3–4, 3, 4 criteria, 247 short term, 241 Harmonisation, of control power, 240 Height response, 128 High pass filter, 276 Hinge moment to trim, 50, 51 Horizontal fuselage datum, 14, 59  Incidence angle feedback to elevator, 298–299, 298 Incidence lag, 243, 247–249, 249	Flight critical stability augmentation see	Gradients, stable, 257–258, <b>258</b>
Flight envelopes, 6, 7, 253–255, 254, 255, 256 extended, 240 large, 37 McDonnell-Douglas A-4D Skyhawk, 254–255, 255, 256 normal load factor, 255 operational, 253, 254 permissible, 253 service, 253 Flight path angle, 13 Flight path angle, 13 Flight test measurement, 325–337, 326 Flow effects, 38 Fly-by-wire: aeroplane, 251 civil transport aeroplanes, 9 controls, 4, 4 system, 278–280, 279 reliability, 279 unstable airframes, 295 Flying, and handling, 3–4, 165–167, 200–202, 240 Flying qualities: lateral–directional, 263–266 Level of, 252–253 longitudinal, 256–260  force components, 74–75 terms, 74–75 Gyration, longitudinal radius of, 263  force components, 74–75 terms, 74–75 Gyration, longitudinal radius of, 263  flyration, longitudinal radius of, 263  Flandley Page Jetstream, 167, 168, 202, 203 elevator angle to trim, 46 flight test, 45, 50–51, 167 phugoid response, 169 roll subsidence mode, 202, 203 with tailplane, 40 Handling, 200–202 and flying, 165–167, 240 long term, 241 pilot's perception, 241 qualities, 3–4, 3, 4 criteria, 247 short term, 241 Harmonisation, of control power, 240 Height response, 128 High pass filter, 276 Hinge moment to trim, 50, 51 Horizontal fuselage datum, 14, 59 Flying qualities: lateral–directional, 263–266 Level of, 252–253 longitudinal, 256–260	=	Gravitational:
extended, 240 large, 37  McDonnell-Douglas A-4D Skyhawk,		force components, 74–75
large, 37  McDonnell-Douglas A-4D Skyhawk,  254–255, 255, 256  normal load factor, 255 operational, 253, 254 permissible, 253 service, 253  Flight path angle, 13  Flight path angle, 13  Flight test measurement, 325–337, 326  Flow effects, 38  Fly-by-wire: aeroplane, 251 civil transport aeroplanes, 9 controls, 4, 4 system, 278–280, 279 reliability, 279 unstable airframes, 295  Flying, and handling, 3–4, 165–167, 200–202, 240  Flying qualities: lateral-directional, 263–266 Level of, 252–253 longitudinal, 256–260  Handley Page Jetstream, 167, 168, 202, 203 elevator angle to trim, 46 flight test, 45, 50–51, 167 phugoid response, 169 roll subsidence mode, 202, 203 with tailplane, 40 wind tunnel experiments, 39, 40 without tailplane, 40 Handling, 200–202 and flying, 165–167, 240 long term, 241 pilot's perception, 241 qualities, 3–4, 3, 4 criteria, 247 short term, 241 Harmonisation, of control power, 240 Height response, 128 High pass filter, 276 Hinge moment to trim, 50, 51 Horizontal fuselage datum, 14, 59  Incidence angle feedback to elevator, 298–299, 298 Incidence lag, 243, 247–249, 249	256	terms, 74–75
large, 37  McDonnell-Douglas A-4D Skyhawk,	extended, 240	Gyration, longitudinal radius of, 263
254–255, 255, 256 normal load factor, 255 operational, 253, 254 permissible, 253 service, 253 Flight path angle, 13 Flight phase, 252 categories, 252 Flight test measurement, 325–337, 326 Flow effects, 38 Fly-by-wire: aeroplane, 251 civil transport aeroplanes, 9 controls, 4, 4 system, 278–280, 279 reliability, 279 unstable airframes, 295 Flying, and handling, 3–4, 165–167, 200–202, 240 Flying qualities: lateral–directional, 263–266 Level of, 252–253 longitudinal, 256–260  elevator angle to trim, 46 flight test, 45, 50–51, 167 phugoid response, 169 roll subsidence mode, 202, 203 with tailplane, 40 wind tunnel experiments, 39, 40 without tailplane, 40 Handling, 200–202 and flying, 165–167, 240 long term, 241 pilot's perception, 241 qualities, 3–4, 3, 4 criteria, 247 short term, 241 Harmonisation, of control power, 240 Height response, 128 High pass filter, 276 Hinge moment to trim, 50, 51 Horizontal fuselage datum, 14, 59 Flying qualities: lateral–directional, 263–266 Level of, 252–253 longitudinal, 256–260 Incidence angle feedback to elevator, 298–299, 298 Incidence lag, 243, 247–249, 249		
254–255, 255, 256 normal load factor, 255 operational, 253, 254 permissible, 253 service, 253 Flight path angle, 13 Flight phase, 252 categories, 252 Flight test measurement, 325–337, 326 Flow effects, 38 Fly-by-wire: aeroplane, 251 civil transport aeroplanes, 9 controls, 4, 4 system, 278–280, 279 reliability, 279 unstable airframes, 295 Flying, and handling, 3–4, 165–167, 200–202, 240 Flying qualities: lateral–directional, 263–266 Level of, 252–253 longitudinal, 256–260  elevator angle to trim, 46 flight test, 45, 50–51, 167 phugoid response, 169 roll subsidence mode, 202, 203 with tailplane, 40 wind tunnel experiments, 39, 40 without tailplane, 40 Handling, 200–202 and flying, 165–167, 240 long term, 241 pilot's perception, 241 qualities, 3–4, 3, 4 criteria, 247 short term, 241 Harmonisation, of control power, 240 Height response, 128 High pass filter, 276 Hinge moment to trim, 50, 51 Horizontal fuselage datum, 14, 59 Flying qualities: lateral–directional, 263–266 Level of, 252–253 longitudinal, 256–260 Incidence angle feedback to elevator, 298–299, 298 Incidence lag, 243, 247–249, 249	-	Handley Page Jetstream, 167, 168, 202, 203
normal load factor, 255     operational, 253, 254     permissible, 253     service, 253     roll subsidence mode, 202, 203     service, 253     with tailplane, 40     wind tunnel experiments, 39, 40     Flight path angle, 13     wind tunnel experiments, 39, 40     without tailplane, 40     Handling, 200–202     Flight test measurement, 325–337, 326     Flow effects, 38     long term, 241     Fly-by-wire:         aeroplane, 251         civil transport aeroplanes, 9         controls, 4, 4         system, 278–280, 279         reliability, 279         unstable airframes, 295     Flying, and handling, 3–4, 165–167, 200–202, 240     Flying qualities:     lateral—directional, 263–266     Level of, 252–253     longitudinal, 256–260     Incidence angle feedback to elevator, 298–299, 298     Incidence lag, 243, 247–249, 249		
permissible, 253 service, 250 service, 260 s	normal load factor, 255	flight test, 45, 50–51, 167
service, 253  Flight path angle, 13  Flight phase, 252     categories, 252  Flight test measurement, 325–337, 326  Flow effects, 38  Fly-by-wire:     aeroplane, 251     civil transport aeroplanes, 9     controls, 4, 4     system, 278–280, 279     reliability, 279     unstable airframes, 295  Flying, and handling, 3–4, 165–167, 200–202, 240  Flying qualities:     lateral–directional, 263–266     Level of, 252–253     longitudinal, 256–260  with tailplane, 40 wind tunnel experiments, 39, 40 without tailplane, 40 wind tunnel experiments, 39, 40 without tailplane, 40 with tailplae, 40 with	operational, 253, 254	phugoid response, 169
Flight path angle, 13  Flight phase, 252 categories, 252  Flight test measurement, 325–337, 326  Flow effects, 38  Fly-by-wire: aeroplane, 251 civil transport aeroplanes, 9 controls, 4, 4 system, 278–280, 279 reliability, 279 unstable airframes, 295  Flying, and handling, 3–4, 165–167, 200–202, 240  Flying qualities: lateral–directional, 263–266 Level of, 252–253 longitudinal, 256–260  without tailplane, 40 Handling, 200–202 and flying, 165–167, 240 long term, 241 pilot's perception, 241 qualities, 3–4, 3, 4 criteria, 247 short term, 241 Harmonisation, of control power, 240 Height response, 128 High pass filter, 276 Hinge moment to trim, 50, 51 Horizontal fuselage datum, 14, 59  Incidence angle feedback to elevator, 298–299, 298 Incidence lag, 243, 247–249, 249	permissible, 253	roll subsidence mode, 202, 203
Flight phase, 252 categories, 252 Flight test measurement, 325–337, 326 Flow effects, 38 Fly-by-wire: aeroplane, 251 civil transport aeroplanes, 9 controls, 4, 4 system, 278–280, 279 reliability, 279 unstable airframes, 295 Flying, and handling, 3–4, 165–167, 200–202, 240 Flying qualities: lateral–directional, 263–266 Level of, 252–253 longitudinal, 256–260  without tailplane, 40 Handling, 200–202 and flying, 165–167, 240 long term, 241 pilot's perception, 241 qualities, 3–4, 3, 4 criteria, 247 short term, 241 Harmonisation, of control power, 240 Height response, 128 High pass filter, 276 Hinge moment to trim, 50, 51 Horizontal fuselage datum, 14, 59  Incidence angle feedback to elevator, 298–299, 298 Incidence lag, 243, 247–249, 249	service, 253	with tailplane, 40
categories, 252  Flight test measurement, 325–337, 326  Flow effects, 38  Fly-by-wire:	Flight path angle, 13	wind tunnel experiments, 39, 40
Flight test measurement, 325–337, 326 Flow effects, 38 Fly-by-wire:     aeroplane, 251     civil transport aeroplanes, 9     controls, 4, 4     system, 278–280, 279     reliability, 279     unstable airframes, 295 Flying, and handling, 3–4, 165–167, 200–202, 240 Flying qualities:     lateral–directional, 263–266     Level of, 252–253     longitudinal, 256–260  and flying, 165–167, 240 long term, 241 qualities, 3–4, 3, 4 criteria, 247 short term, 241 Harmonisation, of control power, 240 Height response, 128 High pass filter, 276 Hinge moment to trim, 50, 51 Horizontal fuselage datum, 14, 59  Incidence angle feedback to elevator, 298–299, 298 Incidence lag, 243, 247–249, 249	Flight phase, 252	without tailplane, 40
Flow effects, 38  Fly-by-wire:  aeroplane, 251  civil transport aeroplanes, 9  controls, 4, 4  system, 278–280, 279  unstable airframes, 295  Flying, and handling, 3–4, 165–167,  200–202, 240  Flying qualities:  lateral–directional, 263–266  Level of, 252–253  longitudinal, 256–260  Incidence angle feedback to elevator,  291  Level of, 252–253  longitudinal, 256–260  Incidence lag, 243, 247–249, 249	categories, 252	
Fly-by-wire:  aeroplane, 251  civil transport aeroplanes, 9  controls, 4, 4  system, 278–280, 279  reliability, 279  unstable airframes, 295  Flying, and handling, 3–4, 165–167,  200–202, 240  Flying qualities:  lateral–directional, 263–266  Level of, 252–253  longitudinal, 256–260  reivil transport aeroplanes, 9  criteria, 247  short term, 241  Harmonisation, of control power, 240  Height response, 128  High pass filter, 276  Hinge moment to trim, 50, 51  Horizontal fuselage datum, 14, 59  Incidence angle feedback to elevator, 298–299, 298  Incidence lag, 243, 247–249, 249	Flight test measurement, 325–337, 326	and flying, 165-167, 240
aeroplane, 251 civil transport aeroplanes, 9 controls, 4, 4 system, 278–280, 279 reliability, 279 unstable airframes, 295 Flying, and handling, 3–4, 165–167, 200–202, 240 Flying qualities: lateral–directional, 263–266 Level of, 252–253 longitudinal, 256–260  qualities, 3–4, 3, 4 criteria, 247 short term, 241 Harmonisation, of control power, 240 Height response, 128 High pass filter, 276 Hinge moment to trim, 50, 51 Horizontal fuselage datum, 14, 59  Incidence angle feedback to elevator, 298–299, 298 Incidence lag, 243, 247–249, 249	Flow effects, 38	long term, 241
civil transport aeroplanes, 9 controls, 4, 4 system, 278–280, 279 reliability, 279 unstable airframes, 295 Flying, and handling, 3–4, 165–167, 200–202, 240 Height response, 128 High pass filter, 276 Hinge moment to trim, 50, 51 Horizontal fuselage datum, 14, 59 Flying qualities: lateral–directional, 263–266 Level of, 252–253 longitudinal, 256–260  Criteria, 247 short term, 241 Harmonisation, of control power, 240 Height response, 128 High pass filter, 276 Hinge moment to trim, 50, 51 Horizontal fuselage datum, 14, 59  Incidence angle feedback to elevator, 298–299, 298 Incidence lag, 243, 247–249, 249	Fly-by-wire:	pilot's perception, 241
controls, 4, 4 system, 278–280, 279 reliability, 279 unstable airframes, 295 High pass filter, 276 Hinge moment to trim, 50, 51 Horizontal fuselage datum, 14, 59 Flying qualities: lateral–directional, 263–266 Level of, 252–253 longitudinal, 256–260 Incidence angle feedback to elevator, 298–299, 298 Incidence lag, 243, 247–249, 249	aeroplane, 251	
system, 278–280, 279 reliability, 279 unstable airframes, 295 High pass filter, 276 High pass filter, 276 High pass filter, 276 Hinge moment to trim, 50, 51 Horizontal fuselage datum, 14, 59 Flying qualities: lateral–directional, 263–266 Level of, 252–253 longitudinal, 256–260  Harmonisation, of control power, 240 Height response, 128 High pass filter, 276 Hinge moment to trim, 50, 51 Horizontal fuselage datum, 14, 59 Incidence angle feedback to elevator, 298–299, 298 Incidence lag, 243, 247–249, 249	civil transport aeroplanes, 9	criteria, 247
reliability, 279 unstable airframes, 295 High pass filter, 276 Flying, and handling, 3–4, 165–167, 200–202, 240 Hinge moment to trim, 50, <b>51</b> Horizontal fuselage datum, 14, 59 Flying qualities: lateral–directional, 263–266 Level of, 252–253 longitudinal, 256–260 Incidence angle feedback to elevator, 298–299, <b>298</b> Incidence lag, 243, 247–249, <b>249</b>	controls, 4, 4	
unstable airframes, 295  Flying, and handling, 3–4, 165–167, 200–202, 240  Flying qualities:  lateral–directional, 263–266 Level of, 252–253 longitudinal, 256–260  High pass filter, 276  Hinge moment to trim, 50, 51  Horizontal fuselage datum, 14, 59  Incidence angle feedback to elevator, 298–299, 298  Incidence lag, 243, 247–249, 249	system, 278–280, <b>279</b>	Harmonisation, of control power, 240
Flying, and handling, 3–4, 165–167, 200–202, 240  Flying qualities: lateral–directional, 263–266 Level of, 252–253 longitudinal, 256–260  Hinge moment to trim, 50, <b>51</b> Horizontal fuselage datum, 14, 59  Incidence angle feedback to elevator, 298–299, <b>298</b> Incidence lag, 243, 247–249, <b>249</b>	reliability, 279
